

## JUNE 2018 NEWSLETTER

From the Chair: This month we concentrate on a human health issue: the dangers of letting your dog lick your face or worse still your mouth!

Kissing is part of our human culture and happens in all forms and descriptions and is, mostly, acceptable to us. However, humans do not use their noses, lips and tongues to openly and publicly explore the nether regions of each other, the highly decorated lampposts or to sample waste matter.!!!

The germs (that is the bacteria in the saliva with *Capnocytophaga canimorsus* being the deadliest), and the viruses inhaled & or licked by your dog leave a residue around the muzzle as well as in the mouth and can therefore be easily transmitted. Some of these germs cause human illness and in a worst-case scenario can cause gangrene, septic shock and even death. Some examples are Leptospirosis, Giardia, E Coli and Rabies with hookworm & roundworms also being problematic.

John Oxford, a Professor of Virology and Bacteriology at Queen Mary University in London, explained in his one article that the dog's mouth is full of bacteria & no matter how many times his teeth may get cleaned... those germs remain - and they are transferable! ☹️

Dogs greet face to face and face to rear end

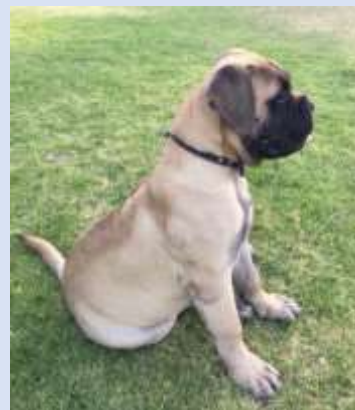

### SOME POINTERS:

- All dog's food bowls and water dishes should be washed separately from household crockery and cutlery.
- Wash hands frequently during and after grooming or handling your dogs
  - After picking up the poop & / or sluicing surfaces

Kieran Todd

SANNIESEBOS DEREK

Kelly Castle

SANNIESEBOS DREADNOT – Steven Stewart

New Russian import - Sansi Gold Always in my soul (Anya) - Noel Abrahams

Eumali Maximus – Mariaan Weideman

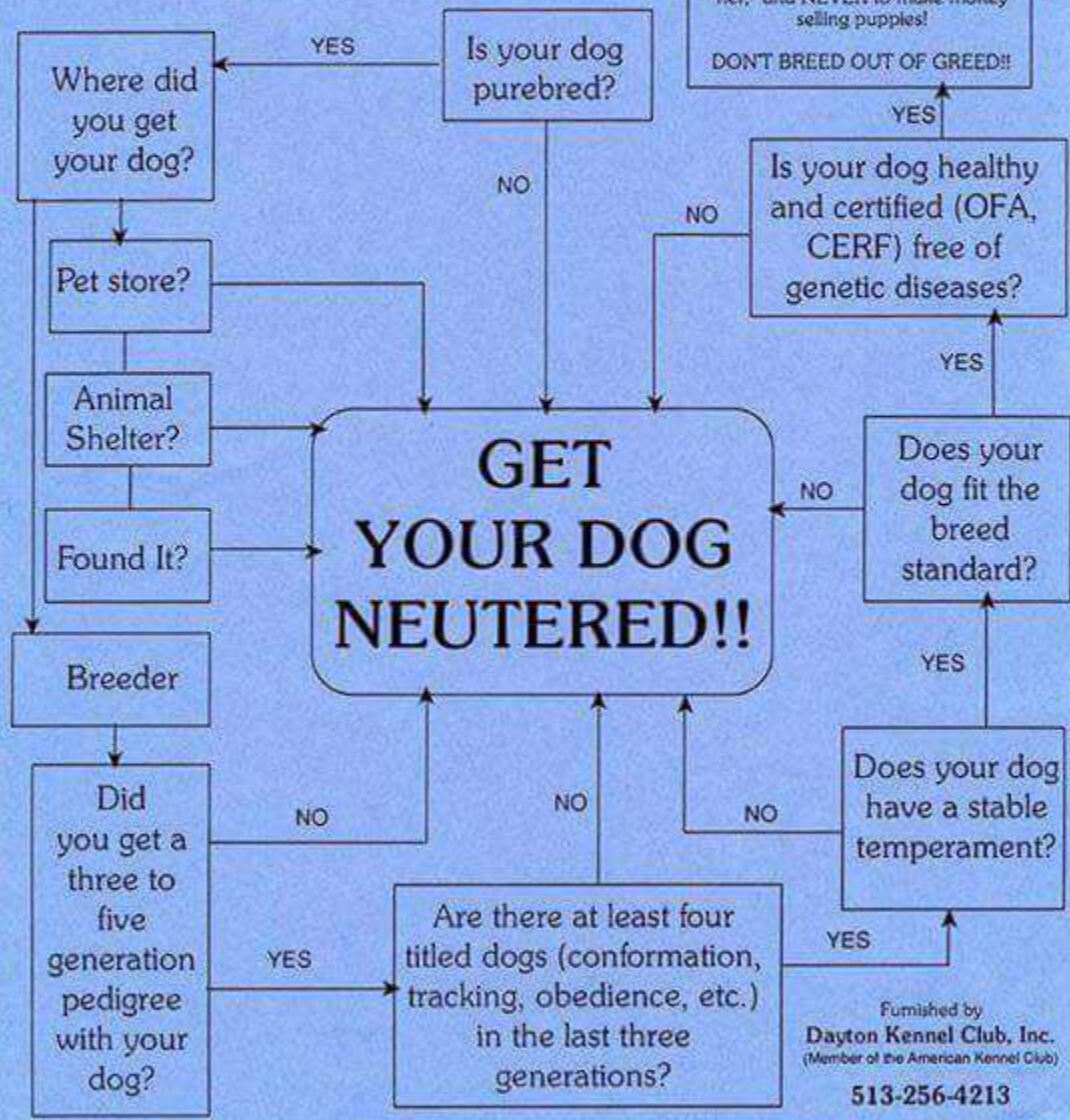

Eumali Hercules – Angie Cuan

### DID YOU KNOW

KUSA registration can be applied for directly after microchipping at 6 weeks. There is an approximate 2-week processing period by KUSA.

It has been noted that some breeders choose not to register their pups or some of the pups in a litter due to cost. These pups are therefore not officially recorded and are lost to statistics.

# IS YOUR DOG BREEDING QUALITY?

Yes, you have a dog of breeding quality. However, if you are not active in showing or working your dog, think very carefully about your reason for breeding. Breeding should be done to improve the breed, not so the kids can see puppies being born, or because you want "a puppy from her," and NEVER to make money selling puppies!  
**DONT BREED OUT OF GREED!!**

Furnished by  
**Dayton Kennel Club, Inc.**  
 (Member of the American Kennel Club)
